5-CEDAR SPRING
Near Pinopolis, Berkeley County, South Carolina

Owner: Santee-Cooper Hydroelectric and Navigation Project

Date of erection: Nineteenth century

Present condition: Fair; in danger of inundation

Description:

Two stories; high hipped roof. The two front rooms are divided by a central hall, which in the rear widens slightly to the left to allow space by the stair. On either side in the rear is a smaller room which shares the chimney with the front room. The interior trim is interesting as retaining much mid-Georgian flavor, though being quite simple. The dados are paneled, the sheathing being overlaid with moulded cleats to form panels. The first-floor mantels have simple architrave surrounds, as do those of the second floor, but in the latter case the overmantel spaces are sheathed.
